

Visitor Management

Take control with a complete hardware and software system for managing and recording every visitor

Remain PoPIA compliant and eliminate the risk of unauthorised visitors accessing your premises, assets or valuable information

- Safe, secure electronic visitor register replaces manual logbooks
- System-driven visitor access for complete control
- Automatic messaging to improve visitor and host interaction
- Integrates with other security components for layered security
- Online reporting portal available for occupancy stats

Product Overview

The Guardian Eye Visitor Management System (GEVMS) is an affordable, user-friendly security solution that allows you to manage and control visitors via smartphone app or online portal. Additional features include a built-in reporting tool, bulk messaging platform and workflow management tool, providing residential estates and businesses with a means to accurately control visitor data.

It allows you to replace manual logbooks with cost-effective and PoPIA (Protection of Personal Information Act) compliant technology

everywhere from housing complexes and estates to corporate offices or industrial sites. Each solution will be unique and specified according to your operational requirements. Not only will visitor access be controlled to provide additional security, but it will also enhance your visitors' overall experience with a seamless access solution from start to finish with automatic welcome messages as well as arrival and departure notifications. Record keeping for analysis and auditing are also available.

How it Works

Features and Benefits

Stay compliant

Comply with POPIA (Protection of Personal Information Act) by sharing and storing data.

Increase Efficiency

Get rid of traditional visitor logbooks by storing visitor data automatically in the cloud.

Save costs

Reduces the need for on-site hardware and IT management.

Full accessibility

Offers the ability to access the platform from any connected device.

Have control and maintain health and safety

Provides valuable reporting analytics including: total number of visitors on site, total visitors per period, average duration, contractors on site, and contractors exceeding pre-booked time slots. This data allows you to plan accordingly, identify any potential suspicious behaviour and put precautions in place for everyone's safety.

Easy integration for added security

Add a multi-factor authentication solution in one platform to manage visitors as well as general access control.

Additional Information

- Easy management for your visitors
- Multi-Channel Communications Platform
- Estate Management Workflow Portal
- Residents Control Access
- Panic Button Alert for Residents
- Video and License Plate Integration
- Solution Options
