

A smart health solution allowing patients (or parents) to receive professional medical diagnoses from the comfort of home

AI-supported remote exams, medical data capture and diagnosis can all be done in less than an hour

- Remote examination/collecting of medical vitals
- Possible early identification of medical conditions
- Medical professionals receives all the data required to make a remote diagnosis
- Creates a record of previous symptoms and diagnoses
- Receive a diagnosis in under an hour
- No need to worry about travel or excessive wait times

Product Overview

Thanks to Guardian Eye Higo Family, **attending to common medical conditions just became a lot less stressful.**

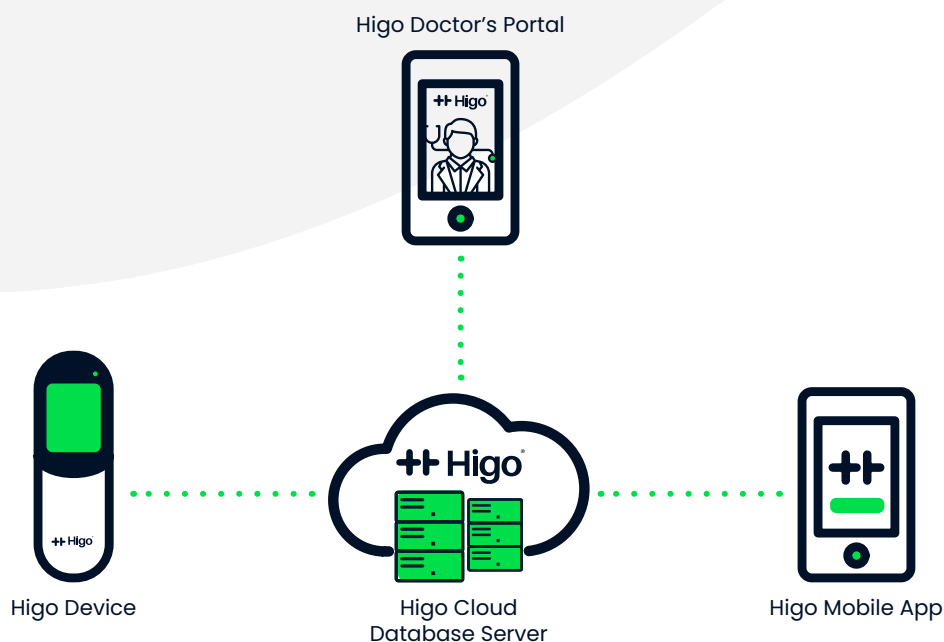

If you or a loved one has fallen ill and you have Higo Family, there's no need to leave home. The stress of travelling to a clinic and waiting in line with the **risk of catching something from the other patients is non-existent.** The doctor's office is... wherever you are. You perform the exams, send the results to the secure Higo app and a diagnosis, recommendations, e-prescriptions, and **your treatment plan is delivered straight back. All in less than an hour.**

Having a GE Higo Family kit at home, or on holiday, enables you to **capture and collect vital medical data** including Temperature (measurement), Breathing (cough audio registration), Lungs (auscultation), Heart Rate (estimation), Abdomen (auscultation), Ear (image exam), Throat (image exam) and Skin (image exam) that can be **transferred to a medical professional immediately** to make a remote, initial diagnosis.

This could lead to **a virtual appointment** via an application with a medical professional for further diagnosis and treatment.

How it Works

Higo Cloud-based Health Platform

Features and Benefits

One device, five interchangeable modules

Allows for easy collection of a range of comprehensive, vital medical data.

Remote diagnosis

Receive almost immediate medical attention from wherever you happen to be via the secure Higo app.

Higo on holiday

No need to book an appointment with a doctor you don't know. Send medical data directly to your own doctor for diagnosis from anywhere.

Compact and easy to use

The exams are simple and intuitive, with step-by-step instructions to guide you along the way.

Extra care for chronic conditions

Guardian Eye Higo Family can be programmed to collect medical data at set times for progress reviews from your doctor remotely.
