Wireless Alarm System

Wireless Intrusion Alarm System – An Intelligent System with Convergent Solutions

Simple setup, powerful protection for bringing peace of mind all day, every day.

- **For visualised and centralised safety management**

- **Flexible and easy to install**

- **Simplifies alarm system maintenance**

- **Powered by IVaaS (Intruder Verification as a Service)**

# Product Overview

The Guardian Eye Wireless Alarm System is both familiar and revolutionary, with proven wireless stability, a wide range of world-class products, and ease-of-use for end users.

The Wireless Alarm System begins with a control panel that acts as a hub for the whole system. Next, a wide range of indoor and outdoor detectors, along with versatile peripherals, including sounders, repeaters, relays, and more, are designed to meet the needs in a multitude of scenarios. Revolutionary in both technology and design, all the products in the range can be added as needed, and can be flexibly linked with other devices. Each one is simple to install and promises outstanding performance.

How it Works

Panic Button
Indoor Sounder
Smart Plug
PIRCAM
PIR Glass Break
AX PRO
Keypad
Magnetic Contact
Outdoor Sounder
IPC
Relay
Keyfob
Hik-Connect

Features and Benefits

Prevent intrusion from the very start
Place detectors around windows, doors, and other areas where intrusions occur for confident security. The Wireless Alarm System detectors deliver precise indoor and outdoor detection and all-encompassing protection, day and night.

Stay informed with real-time video clips
Powered by IVaaS technology, homeowners can verify alarms by watching video clips or GIF imaging when they are away from the property, staying confident and informed.

Detect risks before they break out
The Wireless Alarm system also helps make homes safer for families. It provides fire and water leakage detection before disaster strikes for superior safety at every turn.

Intelligent control with a scalable system
Setup intelligent controls in homes with a whole range of smart control devices, relays, outlets, and more. What's more, the Wireless Alarm system is flexible and can be linked with other devices, offering even more customisation and convenience.
