- Easy to self-install
- View footage 24/7 via the camera app

Product Overview

The Guardian Eye Smart Outdoor Wi-Fi Camera, featuring a built-in siren, strobe light and two-way audio, is **designed to deliver round-the-clock home protection** with **multiple advanced camera technologies**, such as ultra-sharp 2K video resolution, AI-powered human shape detection, colour night vision and more. **Compact in size and durable in any weather**, the Smart Outdoor Wi-Fi Camera is **the go-to option for any home** looking for 24/7 peace-of-mind.

How it Works

Features and Benefits

2K Resolution

This camera excels at providing vivid imaging. Its advanced design makes sure you capture every important detail and re-live every important moment in ultra-clear 2K resolution.

See in colour, even at night

Struggling to see clearly in the dim light around your backyard at night? The Smart Outdoor Wi-Fi Camera makes late-night surveillance a breeze. At night, the camera renders sharp black-and-white video, and can illuminate the surrounding area with its built-in spotlights to capture pictures in full colour.

Built-in AI algorithm for alerts that matter

This camera features a built-in AI algorithm, which means it can identify and distinguish people from pets or other objects. This level of intelligence helps to greatly reduce insignificant alerts you might often receive with other cameras.

Actively guard your home

The built-in siren, strobe and two-way audio features an active defence function to provide

an extra layer of protection. Upon detection of intruders, the camera will set off a loud siren and flash two spotlights for on-site deterrence.

Two-Way Talk

Thanks to the app, you can easily greet your visitors or verbally warn any unwanted trespasser at any time – even if you are away from home.

Save on storage space and reduce network loads.

With advanced H.265 video compression technology, the camera achieves the same or even better video quality with only half the bandwidth and half the storage space required by the previous H.264 video compression standard.

Durable in any weather

With an IP67-rated enclosure, this camera ensures long-lasting performance even under the toughest weather conditions – whether it's rainy, stormy or even snowy.
