## Product Overview

The Guardian Eye Outdoor Pan / Tilt Camera offers a giant breakthrough by combining an exquisite design with comprehensive functionality. Thanks to 360-degree visibility, this camera captures more details than ordinary outdoor cameras do, ensuring reliable, all-around outdoor protection.

# How it Works

## Features and Benefits

### See everything in clear detail

This camera captures 1080p high-definition video and images, recording every moment with sharp clarity.

### A better day begins with better vision

Your surroundings are covered with this Outdoor Pan / Tilt Camera. With a 352° horizontal rotation and 95° vertical rotation giving you an easy overview of all that's around you. While the app puts it all right on your smartphone or mobile device.

### AI-powered person detection.

Smarter than ever! As an upgrade from simple motion detection, the embedded AI algorithm intelligently detects the motion of human shapes in real-time. You'll receive immediate alerts when people enter your customised detection area.

### Strobe light for enhanced protection

Featuring two spotlights for active protection, this camera allows you to manually flash the light via the app or set it to flash upon detection of people passing by.

### Three night vision modes are available to meet any need

- Full-colour night vision
- Black-and-white night vision
- Smart night vision

### Elegant and durable design

This camera features a novel round and compact design with a simple black and white housing. It's stylish enough to look good anywhere. What's more, its weatherproof design keeps it operating without being interrupted by any kind of weather – wind, rain, or snow.

### Hear what's happening

The built-in noise-cancelling microphone picks up clear audio and lets you hear and see what's happening around your home, wherever you are.
