

Wi-Fi Camera

# Indoor Pan-Tilt Camera

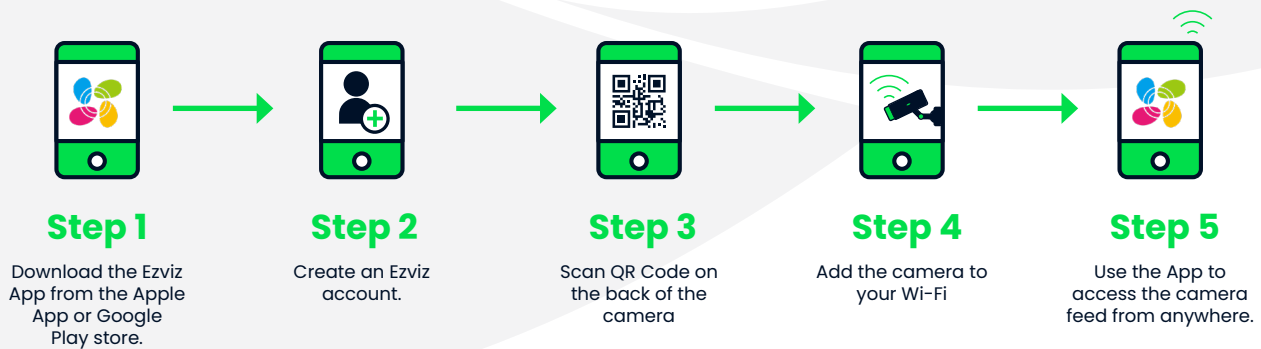

It's got you covered – all day & night.

- Use indoors
- Motorised pan / tilt for 360-degree coverage
- Motion detection and sleep mode for privacy
- 1080p Full HD video resolution with smart night vision
- Supports a MicroSD card up to 256GB
- View footage 24/7 via the camera app

## Product Overview

The Guardian Eye Indoor Pan / Tilt Camera comes equipped with a **smart IR (Infrared) function**, which uses **advanced IR lighting** to capture more detail, even in dim light. With its 360-degree field of view and smart tracking function, you won't need to worry about missing a thing.

# How it Works

## Features and Benefits

### Smart night vision with smart IR

With Smart IR, the intensity of the infrared LEDs automatically adjusts to prevent overexposure in night vision mode, so you'll get more details of the object or person captured at night

### Zero blind spots

Keep tabs on every corner. The Indoor Pan / Tilt Camera's expansive 360-degree field-of-view ensures full coverage, so you don't miss a thing.

### Smart and neat

When it detects anything in motion, the camera is smart enough to start tracking it, alerting you with an image via the app in real-time.

### Communication anytime

Talk to your loved ones and deter unwelcome strangers – all with the two-way communication feature via the camera app.

### Protect your privacy

With one tap on the app, you can enable the camera's sleep mode, giving you privacy whenever you need it.

### Multiple storage solutions

Save your recordings with flexible and secure options. The camera comes with a built-in MicroSD card slot that can store up to 256GB of recorded footage. You can also save your images to the cloud for additional back-up.
