Product Overview

The Guardian Eye Battery Powered Camera is a 100% wire-free, rechargeable camera that delivers well-rounded home protection for up to 210 days on one single charge. It can be easily installed anywhere for enhanced security, and features our core technologies of colour night vision, two-way talk, active defence and more.

How it Works

Features and Benefits

Long life battery life for extended peace-of-mind

Equipped with a 7800 mAh rechargeable battery, this camera can last for up to 210 days on one full battery charge, ensuring stable performance all day and night.

Vivid Night Vision

Thanks to two built-in spotlights, the Guardian Eye Battery Powered Camera renders vivid colour imaging even in complete darkness. Allowing you to see crucial details that would otherwise be lost.

Motion alerts are more accurate than ever

Featuring an integrated PIR sensor and person-shape detection algorithm, this camera is intelligent enough to distinguish people from other moving objects, keeping you safe while also reducing unwanted notifications.

A vigilant guard over your property

You can set specific time frames for detection. Once the camera detects a person, it automatically sets off a siren and flashes two spotlights to let trespassers know they have been detected.

Customisable voice messages

This camera allows you to record unique voice messages for greeting or deterrence.

Talk as if you were there

See and hear what's going on and chat with your visitors via two-way talk, all via the camera app.

Fast and easy wire-free setup.

Featuring a large battery, Wi-Fi connectivity, and a magnetic base, this camera requires exactly zero professional help to install. Simply attach the camera to any metallic surface and it's good to go!

Built to last

This camera features an IP66 enclosure, offering high levels of protection against dust and water, delivering long-lasting protection in even the toughest weather conditions
