

Click & Collect E-Script

An electronic pharmacy script portal that offers the added benefit of health tracking and emergency contact speed dialing.

Choose your closest pharmacy for script collection, delivery or to be sent to a secure POP box.

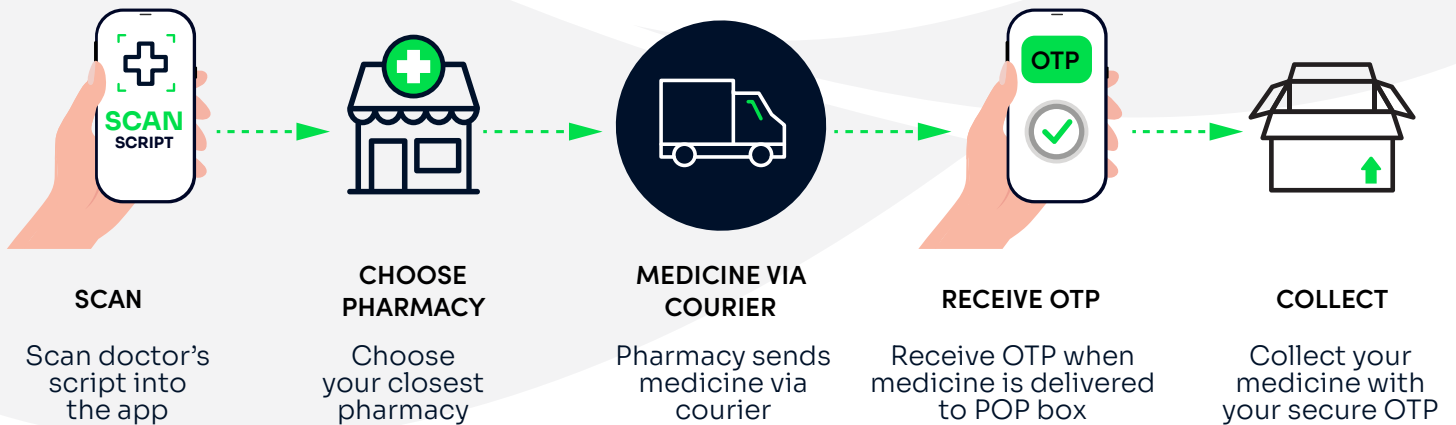

- Easy to use delivery booking app
- Request an on-demand delivery instantly
- Accessible on multiple device types
- Send payment link to customer instantly
- Full visibility & management of all orders

Product Overview

An electronic pharmacy script portal that offers the added benefit of health tracking and emergency contact speed dialing. The app lets customers choose a pharmacy to scan a script for collection, delivery or to be sent to a secure POP box installed at various locations for easy retrieval. It also allows pharmacies to digitise the customer journey and extends client reach, while providing an added branding or advertising opportunity.

Guardian Eye Click & Collect E-Script allows doctors to automatically link patients to their medical schemes and reimbursement rules, thus minimising the inconvenience and unnecessary costs of co-payments on processing of the prescription by the participating medical scheme. The app includes a full listing of all approved pharmaceutical preparations, their pricing and all the generic equivalents.

How it Works

Features and Benefits

Easy to use delivery app

Allows for extended client reach

Accessible on multiple device types

Provides safe and secure prescriptions

Full visibility and management of all orders

Allows for a reduction of co-payments on medical aid schemes

Real time status updates for pharmacy and customer

Allows pharmacies to digitise the customer journey
