

## Guardian Eye pioneers lead battery regeneration in South Africa, extending battery lifespan and reducing waste.

### Double the service life

The regeneration of batteries and oils aims to double their lifespan and combat the programmed obsolescence of sometimes critical materials with a high CO<sup>2</sup> impact.

### Reducing carbon emissions

Where possible, regeneration solutions drastically reduce carbon emissions.

## Breathing New Life into Your Old Battery with Our Monthly Managed Service

### **30% Less Expensive**

Reduce operating costs by up to 30%.

### **100% CSR**

Respect for the environment and CSR commitments.

### **Local Employment**

Contributing to territorial resilience

### **50% Less Waste**

Industrial waste halved.

### **2 x Longer**

Doubling battery life

### **50 to 70 x Less Carbonated**

Reduced pollution thanks to lower greenhouse gas emissions

**Quarterly Maintenance & Off-site Monitoring:** Regular, proactive upkeep and real-time monitoring to extend battery life and ensure optimal performance—no extra costs for maintenance.

**Comprehensive Insurance Coverage:** Peace of mind with insurance included, protecting your investment against unforeseen risks and damages.
